LUBRICANTS (POE) FOR AC / R SYSTEMS

**POE
LUBRICANTS**

LUBRICANTS (POE) FOR AC / R SYSTEMS

DESCRIZIONE

These oil series are **fully synthetic lubricating fluids, based on synthetic and biodegradable polyesters oils (POE)** with a particular anti-wear additive package designed specifically for **use in refrigeration and air conditioning systems** loaded with alternative refrigerants not detrimental to the ozone layer.

PROPERTIES

- **Higher lubricity values** compared to traditional mineral-based lubricants.
- **Excellent anti-wear performance** for steel and aluminum surfaces, allowing to **extend the life and efficiency of the system lubricated.**
- **Chemically and thermally stable products**, compatible with residues of mineral oils or alkylbenzene which may remain in a system after the replacement by CFC or HFC.
- **Miscibility with both mineral and synthetic oils (polyalphaolefin - PAO or polyester - POE).** In case of mixture with a different

- nature or viscosity lubricant, the characteristics and performance of the product may change.
- **Rust and corrosion protection of metals**, particularly copper alloys.
- **Compatibility with coatings, elastomers and paints.**
- **Formulation with biodegradable, non- dangerous bases for human health**, for the protection of the operators and the environment in case of accidental spillage.
- **The products are NOT compatible with polyalkylene glycol (PAG) based oils.**

APPLICATIONS

These POE lubricants are specifically used as a first filling of piston compressors, rotary and centrifugal pumps in closed systems for domestic or industrial refrigeration and air conditioning systems of motor vehicles.

- **ISO 22, 32, 46, 68:** suggested for use in piston compressors
- **ISO 68, 100, 120, 150, 170, 220:** suggested for use in screw compressors or centrifugal pumps
- **ISO 80:** suggested for use in electric compressors or when a dielectric compressor lubricant is required (complies with specification IEC 61099)

They are also suitable for use in refrigeration and **air conditioning systems loaded with alternative non-ozone depleting refrigerants such as R- 134a, R-404a, R-407C, R-410a.**

AVAILABLE (MAINLY) IN THE FORMATS:

100% SYNTHETIC BIODEGRADABLE POLYESTER-BASED

LUBRICANTS (POE) FOR AC / R SYSTEMS

**POE
LUBRICANTS**

They can be used in systems where refrigerants R- 12, R-22 and R-505 to those not harmful to the ozone layer.

◆ WARNINGS

These products are not recommended in refrigerating systems loaded with ammonia (in this case, we suggest usage of mineral based oils).

The products are hygroscopic, and absorb the humidity and mist/condensation in the air: it is recommended to carefully seal the packaging after use and store them in a dry place at temperatures between -20 ° C and + 40 ° C.

In the case of storage at below -20°C, it is recommended to heat the product above 20°C before use, to eliminate as much as possible any moisture.

◆ SAFETY INFORMATIONS

Read and observe the safety warnings on the container label. For information on handling, transport, etc ..., refer to the Material Safety Data Sheet (MSDS) relating to the product in question.
